

Products and services

Our customers are phone and broadband providers who use our products to deliver services to their residential and business customers.

Our customers

We operate an open network that many different phone and broadband providers access in order to provide innovative products and services to all types of customers.

Health and safety

Keeping our people and our environment safe is our priority. Discover what our commitment to ensuring a safe and secure environment really means.

Network Reporting

Our UCLL, SLU, UBA, key performance indicators and 30r reporting.
