

Unbundled Copper Local Loop Performance Report

Consolidated Report

August 2013

Unbundled Copper Local Loop (UCLL) Performance Reports are prepared each month to provide a comprehensive view of our performance over the preceding month. These reports measure our performance against service levels defined in the UCLL Standard Term Determinations.

Executive summary

There were two Service Level Defaults this month: SL 4 (Order is completed right first time) and SL 17 (System Availability of OO&T). Service Default Reports for these Service Levels can be found in the appendix of this report.

Points to note

Orders were excluded from Service Level calculations as follows:

- SL 2 (Notification of Rejection) - orders were excluded where the default was the direct result of an action that is the Access Seeker's responsibility under the UCLL General Terms
- SL 4 (Right First Time) - those faults not reported within 5 working days of completion or where no fault was found for which Chorus is responsible, were excluded from this measurement
- SL 15 (Faults restored within notified expected restoration time) - those faults reported where no fault for which Chorus is responsible was detected, and those defaults that occurred as a result of inability to access the end-users premises were excluded from the measure

Defaults that occur at the Access Seeker level but not at the consolidated level are reported to the relevant Access Seeker, in their individual Performance report.
